- Interleukin 2 5C/7C
- Interleukin 4 4C
- Interleukin 6 7C/9C/15C
- Lymphatic vessel 4C
- Medulla ossis 4C
- Mountain cranberry 3X
- Thymus gland 4C

Package size:

Net Wt. 8 g/0.28 oz. 2 Tubes

Uses:

Used for the prevention of infections; potentization of the immune defenses in acute and chronic infections; and in the treatment of acute inflammatory events of infective origin.

Directions:

5 pellets 2 times a day. In acute phases, 10 pellets 2-3 times a day.

Most common combinations

- Citomix + Guna-React: immediate activation of immune defenses in patients affected by acute infective diseases.
- Citomix + Guna-Virus: strengthening of non specific antiviral immune defenses.
- Citomix + Guna-Flu: anti-influenza prophylaxis in immuno-deficient patients who previously suffered from recurrent flu episodes.
- Citomix + Guna-Tonsils: chronic-recurrent tonsillitis in immuno-deficient patients.
- Citomix + Eubioflor: immune strengthening in patients suffering from intestinal dysbiosis.
- Citomix + Guna-Cough*/Guna-Noni**): chronic bronchitis (children*, adults or elderly**).
- Citomix + Guna-Matrix + Guna-Cell + Guna-Fem/ Guna-Male: immunostimulation therapy.
