

• GUNA®-FLU

Ingredients:

- Aconitum napellus 5C
- Anas barbariae, Hepatis et Cordis extractum 200CK
- Asclepias vincetoxicum 5C
- Belladonna 5C
- Cuprum metallicum 3C
- Echinacea angustifolia 3C
- Influenzinum 9C

Uses:

Prevention and treatment of influenzal and cold syndromes.

Directions:

Prevention: 1 dose a week for at least 6 weeks starting from September to October. It offers an excellent protection against influenzal and para-inflenzal viruses.

Treatment: start during the first 12-24 hours from the onset of the pathology, to treat the symptoms of cold and flu: 1 dose every 6-8 hours till remission of the acute phase.

Most common combinations

- Guna-Flu + Citomix: anti-influenzal prophylaxis in immuno-deficient patients, or those experiencing recurrent influenza episodes.
- Guna-Flu + Citomix + Guna-Cell: anti-influenzal prophylaxis in immuno-deficient patients or suffering recurrent influenza in the past, particularly elderly patients.
- Guna-Flu + Guna-Virus: anti-influenzal prophylaxis in patients previously affected by viral infections of the upper, middle and lower respiratory tract.
- Guna-Flu + Guna-Tonsils: anti-influenzal prophylaxis in patients, particularly children previously affected by tonsillitis or adenotonsillar hypertrophy-hyperplasia.
- Guna-Flu + Guna-Flam: influenza with fever.
- Guna-Flu + Guna-Cough: influenza with dry and productive cough, especially in children.
- Guna-Flu + Guna-Sinus Nose Spray: influenza with sinusitis.
- Guna-Flu + Guna-Rhino Nose Spray: influenza with rhinitis and rhinorrhea.
