

Resource Cream

Restoring, Soothing and Replenishing Cream

With flower extracts according to Dr. Bach's original method

with
Tea-tree oil

- * Preservative free
- * Paraben and lanolin free
- * Fragrance with natural essential oil of Tea-tree
- * Nickel tested
- * Dermatologically tested

In all seasons, our skin is exposed to environmental agents (pollution, extreme cold, excessive exposure to sunlight, wind), which worsen dryness, reddening and irritation, while reducing its elasticity. The alteration of the physiological condition of the skin makes it even more sensitive and exposed to accidental events such as insect bites, minor burns and traumas, etc.

Resource Cream was designed to maintain the physiological function of the skin, counteracting stress and harmful environmental agents. The nourishing, emollient and soothing properties of its plant ingredients give elasticity and moisture to the skin. Its soft and pleasant texture gives a sense of relief and well-being. The essential oil of Tea-tree, known for its antibacterial properties, gives it a pleasant and typical fragrance.

The Bach Flowers included in the formulation of Resource Cream reflect emotional archetypes from which you can take inspiration in order to evoke your own innate resources and adaptability, in order to experience a sense of wellbeing.

According to Dr. Bach, **Cherry Plum** is an archetype of Self-mastery, **Clematis** of Presence as well as of Mind-Body Connection, **Crab Apple** of Purity and Self-acceptance, **Impatiens** of Peacefulness, **Rock Rose** of Courage, **Walnut** of Sensitiveness and Adaptability, and **Star of Bethlehem** of Elaboration and Resolution.

Prepared with **WHITE Holographic Bioresonance®** method. Light emission through optical filters informed with plant-derived raw material.

WHITE
HOLOGRAPHIC
BIORESONANCE

How to use

apply on the affected areas, or all over the body, with a gentle circular massage.

Packaging

50 ml tube.

Ingredients

Aqua, Caprylic/capric triglyceride, Glycerin, Cetearyl alcohol, Prunus amygdalus dulcis oil, Butyrospermum parkii butter, Myristyl myristate, Cetyl alcohol, Glyceryl stearate SE, Capryloyl glycine, Cetearyl glucoside, Clematis vitalba flower extract, Prunus cerasifera flower extract, Impatiens glandulifera flower extract, Ornithogalum umbellatum flower extract, Helianthemum nummularium flower extract, Malus sylvestris flower extract, Juglans regia flower extract, Glyceryl caprylate, P-anisic acid, Sodium hydroxide, Calendula officinalis flower extract, Glyceryl undecylenate, Trisodium ethylenediamine disuccinate, Xanthan gum, Melaleuca alternifolia leaf oil, Limonene.

WHITE Holographic Bioresonance® method

Water is the essential component of the human body: about 99% of its molecule number and 60-70% of its weight!

Though having one single chemical composition (H₂O), **water molecules can express two different phases**: in one phase they float freely, in another phase **they are organized in structures characterized by a common oscillatory rhythm known as Coherence Domain⁽¹⁾**. Coherence Domains are in resonance with electromagnetic fields of specific frequencies.

When the water of living systems gets in touch with the organic matter, it is structured in a characteristic organized and coherent way, according to specific frequencies emitted by the living matter itself^(2,3).

Coherence Domains

Super Coherence

"Vortices generated in 1000 lt of water put in open air containers to be swirled.

Photo A: Normal water. You can see a single and regular vortex.

Photo B: Water exposed to WHITE light with optical filters used for Guna Bach Flowers. You can see different organized spirals according to fractal dynamics; this phenomenon is due to a lower viscosity of water induced by super-coherence".

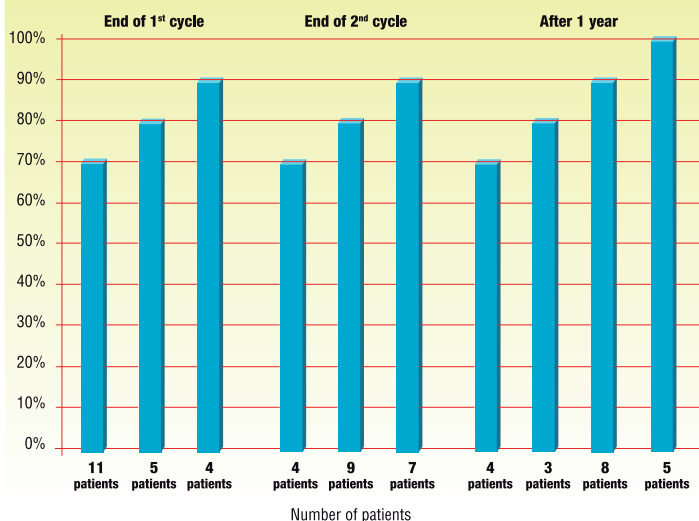

This special biological organization of water, called super coherence, (coherence among coherence domains) is being researched by *Montagnier, Del Giudice, Tedeschi and Vitiello⁽⁴⁾*.

This feature of biological water is being exploited by Guna Laboratories using a method developed by the WHITE research group. Through materials informed by specific electromagnetic fields generated by light passing through vegetal filters characterized by high biodiversity and bioactivity that is coherent with biophotons⁽⁵⁾ emission. These materials inform the liquid element, thus obtaining Super-Coherent Water^(4, 6, 7, 8, 9).

In the case of Guna Resource line, an optical filter is added to the WHITE process for each specific formula. This is aimed at obtaining a special resonance that is specific for this formula itself as well as a synergistic effect with its constituent mother essences⁽¹⁰⁾, by using specific electromagnetic fields.

Effects of the treatment with WHITE Holographic Bioresonance® Method applied to active ingredient free isotherapeutic Remedies and Gels for topical use on patients suffering from Chronic Psoriasis Vulgaris

The vertical axis represents the % of Improvement in the affected Body Surface Area.
